GARDEN

At Visinets May 22, 1870

Dear Sir.

I really do not know how to thank you for the gracious package of seeds that you sent me and mainly for the warm thoughts. If I was tardy in writing you it is because I wanted to announce to you at the same time that the ten seedings whose growth is occurring at this time, began growing the moment they were seeded. I would also like to mention that the seeds collected here take more time to grow than the ones collected in your country. When the postage was stamped on the letter by the employee of the postal service, they crushed a part of the oily sac where the packets where placed. Regardless, I am very happy to see that there are still some specimens. Today I want to place myself at your disposal; if at any time I can be of help to you, in whatever it is, it will be for me a great pleasure.

Look here, I am going to send you some seeds of my Echinocactus Cereus and Agave? In case this will be agreeable to you, I will make an effort to send you a few better specimens that I have here:

?? (Ceuyani) Ousselghemania

?? (Ectrim) Myriostigma, Ornatis, Capricornium.

I would like to ask you to continue your letters which I enjoy very much.

I do not know if the Lichen Californicus exists around here; it is a plant that has disappeared and we have not found it for a long time.

I will always be happy to show you evidence of my appreciation.

Receive my deepest and most devout greetings.

Guedeney
